^{*} If using a max payment set by the guidelines or the local board, take the capped payment and divide by the approved percentage to come up with the total cost. Example - if a board set a max payment of \$5,000.00, the total cost would be \$6,666.67, if district cost rate is 75%. (\$5000 divided by 0.75 - \$6666.67) Example - if an applicant signed up for cover crops and enough acres, the \$3,200.00 cap would make the total cost \$4,266.67. (\$3200 divided by 0.75 - \$4266.67)
